DETAILED ACTION

1. All outstanding rejections and objections are overcome by applicants' amendment and 1.131 declaration filed 7/7/05.

The new grounds of rejection set forth below are necessitated by applicants' amendment and thus, the following action is final.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 5-10,13,15, 34, 38-43, 46, and 48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 34 have each been amended to recite "the polyelectrolyte is from 2,000 up to 10,000 weight average molecular weight". It is the examiner's position that this phrase fails to satisfy the written description requirement under the cited statute since there does not appear to be a written description requirement of the above phrase in the application as originally filed, *In re Wright*, 866 F.2d 422, 9 USPQ2d 1649 (Fed. Cir. 1989) and MPEP 2163. Applicant has not pointed to any portion of the specification, and examiner has not found any support for this phraseology in the specification as originally filed.

Art Unit: 1714

While the present specification refers to "molecular weight", there is no disclosure of "weight average molecular weight" in the specification as originally filed.

NOTE: If applicants' were to submit a declaration stating that the molecular weight referred to in the present invention is in fact weight average molecular weight and further, how it is determined or known that the molecular weight referred to in the present invention is in fact weight average, i.e. by disclosing how the molecular weight was measured, this would overcome the 35 USC 112, second paragraph rejection of record set forth in paragraph 3 above. It is noted that if such declaration were submitted, there would be no need to insert "weight average" into either claim 1 or claim 34.

4. Claims 1, 5-10,13,15, 34, 38-43, 46, and 48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 34 have each been amended to recite "the polyelectrolyte is from 2,000 up to 10,000 weight average molecular weight". The scope of the claim is confusing because it is not clear how a polyelectrolyte is weight average molecular weight. It is suggested that the phrase be rewritten as, for instance, "the weight average molecular weight of the polyelectrolyte is from 2,000 up to 10,000".

Art Unit: 1714

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Callie E. Shosho whose telephone number is 571-272-1123. The examiner can normally be reached on Monday-Friday (6:30-4:00) Alternate Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
